# The UNFCCC's Bali Roadmap: building long-term cooperative action to address climate change

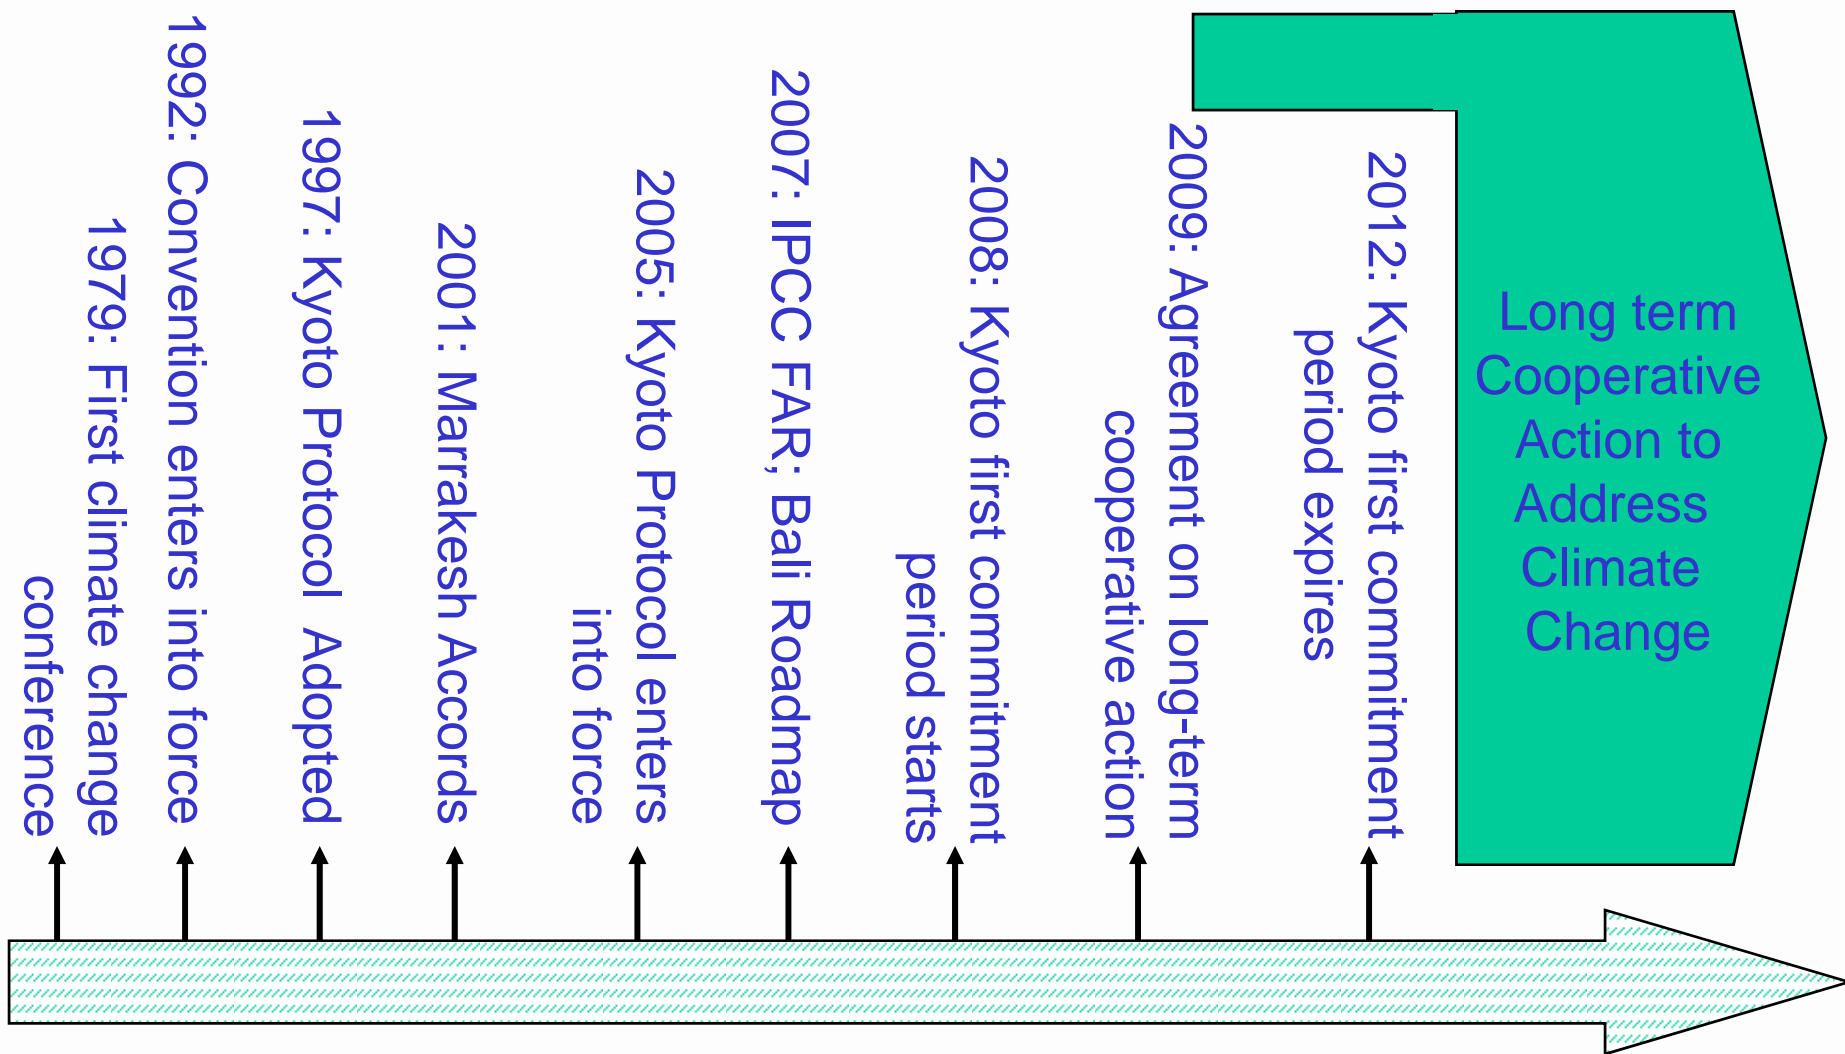

# Outline

- Introduction: The UNFCCC
- The Bali roadmap
- The Bali Action Plan
- What is needed?

# The UNFCCC

**Objective:** stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system. Such a level should be achieved within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner.

# The UNFCCC: timeline

# The Bali Roadmap

- A two year negotiating process for a broad and robust response to climate change. Components:
  - A new negotiation process (LCA)
  - Deforestation
  - Technology transfer
  - Kyoto track: time table for the AWG, adaptation fund and the review of the Protocol

# Key aspects of the Bali Action Plan (12/3/2007)

- Economic growth and poverty eradication are global priorities
- Reducing Emissions from Deforestation
- Deep cuts in global emissions are urgently required
- Provision of incentives to engage all Parties
- Going beyond assistance: the role of business and the private sector through right investment decisions
- A long term vision
